Section IV – FIRST AID MEASURES

Inhalation:
Move subject to fresh air

Eye Contact:
Flush eyes with a large amount of water for at least 15 minutes. Consult a physician if irritation persists.

Skin Contact:
Wash affected skin areas thoroughly with soap and water. Consult a physician if irritation persists.

Ingestion:
If swallowed, give 2 glasses of water to drink. Consult a physician. Never give anything by mouth to an unconscious person.

Section V – FIRE FIGHTING MEASURES

Flash Point: Noncombustible (Water Solution)
Auto-ignition Temp: Not Applicable
Lower Explosive Limit: Not Applicable
Upper Explosive Limit: Not Applicable

Unusual Fire and Explosion Hazards:
Polymers will not burn. However, dried polymer films are capable of burning. Material may spatter if temperatures exceed the boiling point (212°F). After the water is evaporated, decomposition or combustion of the dry solids may generate irritating vapors, monomers, hydrocarbons, HCN, CO and CO2.

Special Firefighting Procedures:
Wear self-contained breathing apparatus and full protective gear.

Extinguishing Agents:
Use extinguishing media appropriate for surrounding fire.

Section VI – ACCIDENTAL RELEASE MEASURES

Steps to be Taken in Case Material is Released or Spilled:
Contain spills immediately. Dike and contain spill with inert material (e.g. sand, earth). Transfer liquids and diking material to suitable containers for recovery or disposal.

Caution:
Keep spills and cleaning runoff out of municipal sewers and open bodies of water.

Waste Disposal Method:
Dispose of in accordance with local, state and federal regulations.
Section VII – HANDLING AND STORAGE INFORMATION

Storage Conditions:
Keep from freezing; material may coagulate. The minimum recommended storage temperature for this material is 1°C/34°F. The highest recommended storage temperature for this material is 49°C/120°F.

Handling:
Avoid breathing of vapors. Handle in well-ventilated workspace. When handling, do not eat, drink, or smoke. Avoid contact with skin.

Engineering Controls (Ventilation):
Use local exhaust ventilation with a minimum capture velocity of 100ft./min. (0.5 m/sec) at the point of vapor evolution.

Respiratory Protection:
Not required under normal conditions in a well-ventilated workplace. An organic vapor respirator National Institute for Occupational Safety and Health (NIOSH) approved for organic vapors is recommended under emergency conditions.

Eye Protection:
Chemical safety glasses.

Hand Protection:
Chemical resistant gloves.

Other Protective Equipment:
Facilities storing or utilizing this material should be equipped with an emergency shower and eyewash station.
